Townsend Sport Series Hinged Neoprene Braces

Sport XVI-AC
(16" anterior
closure sleeve,
4 straps)

Townsend has redesigned and enhanced our Sport Series hinged neoprene sleeves for mild ligament injuries and instabilities. Townsend Sport braces are designed for patients who require the functional support, compression and proprioceptive benefits of a hinged soft-shell brace. The new Sport Series braces are lower profile and provide more consistent control than similar products -- and have the added benefit of no exposed metal.

Medical professionals can choose from latex-free anterior closure neoprene sleeves or latex-free pull-on neoprene sleeves. The braces are available in 12 inch length (two strap models) or 16 inch length (four strap models). **Each of these braces feature a unique design that encases the aluminum bars in rigid nylon pockets. The hinges are also covered, yet can be easily accessed for making adjustments to range-of-motion settings.**

Sport XII-PO
(12" pull on
sleeve, 2 straps)

Townsend's new Sport Series braces now include your choice of three different hinge designs that feature Townsend's patented roll-and-glide motion for enhanced functional control.

Featured Product: Foot

PneumaticWalker™ Diabetic System

Specifically designed to meet the needs of the higher risk diabetic patient, the PneumaticWalker Diabetic System features the PneumaticWalker for Diabetics. Similar to the PneumaticWalker, the PneumaticWalker for Diabetics incorporates an innovative dual density insole to eliminate pressure points. This insole, when combined with the semi-rigid shell and full aircell coverage, also helps regulate shear stress. The Walker's shell/aircell design maximizes plantar unloading and provides protection and immobilization.

A specialized Hand Bulb with Pressure Gauge is included with each System to measure individual aircell compression. This precise measuring ensures regulated aircell inflation for neuropathic patients. The PneumaticWalker Diabetic System is an ideal alternative to total contact casting. Unlike casting which requires costly and time consuming removal and application during skin and wound examinations, the PneumaticWalker for Diabetics can be easily removed and reapplied time after time. Walking Brace Extension Straps are available to increase the strap length by 4" (10 cm).

Mission Statement

To be a company that will provide quality products at fair pricing, with an emphasis on customer relations. To build our core business with value added products and services for our customers. To use our experience and longevity in the industry to build more identity and recognition in the medical institutions that dispense Orthotic braces. To expand our technology and infrastructure in order to enhance our productivity.

Vision

To be a valuable resource for the medical institutions in need of Orthotic, off the shelf and custom braces, with high ethical standards and principles.

Product features and benefits

* An aircell lined shell that maximizes plantar unloading, regulates shear stress, and provides protection and immobilization * Graduated compression to help reduce edema * Multi-aircell support for a "total contact" fit * Regulated aircell inflation with the specialized Hand Bulb with Pressure Gauge * A rocker sole to reduce plantar pressures

Pneumatic Walker Diabetic System includes

(1) Pneumatic Walker for Diabetics * (2) Insoles * (3) Stockings * (1) Hand Bulb with Pressure Gauge

Additional insoles and stockings are available in the Diabetic Replacement Kit.

The Hand Bulb with Pressure Gauge. may be ordered separately

Indication

Foot protection
Neuropathic ulcers
Soft tissue injury
Post-operative use
Stable fracture of foot and/or ankle

Featured Product: Wrist

Great choice for wrist sprain/strains, carpal tunnel, and post-cast support.

Features & Benefits:

- **perforated suede:** provides exception product durability; cooler to wear
- **malleable stays:** palmar stays allow patient customization
- **thumb cut-out:** allows better opposition
- **single pull lace closures:** allows easy, one-handed application
- **polypropylene felt:** provides maximum patient comfort; wicks moisture away from skin
- **US manufacturing:** higher quality control standards

Trivia

1. What city is Townsend Designs Braces facility located?
(A) Los Angeles (B) Bakersfield (C) San Francisco (D) Memphis
2. What type of splint would you use to treat DeQuervains Syndrome?
(A) AFO (B) Wrist support (C) Thumb Spica (D) Ultra Sling
3. What city was Elvis Presley born?
(A) Tuepelo (B) Tunica (C) Memphis (D) Cornith
4. Who won the Superbowl last year?
(A) Colts (B) New England (C) Tampa Bay (D) None of the above
